

Project CY 8609

Task

1. Describe the technical facility located via:

SG1A

2. Within the following ten year period determine if and when any "special events" occur:

1978

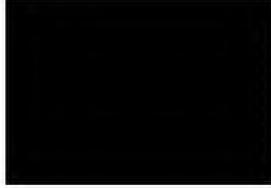

1988

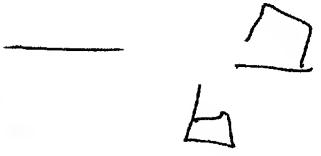

*Note: If you do find any "special events" -- subsequent sessions will be focused on each separate "special event."

Policies to policies on towards 1985

Places used to be same disrupter externally disrupted. Angerants disrupt. Negative feelings over disruption. Possible have involved in destruction.

External to associates.

Habits present but scattered as it disassociated & demolished.

People gone. Except for some they no longer work. People avoid place.

Answers

As far as I know

1046

Site involves a facility with an overall purpose to produce something (not necessarily physical). A smaller structure within facility compound does produce something perhaps hazardous. Activity/operators filled up at Site ca. late '83, increased, then decreased last quarter 1984, then increased again, continue at high level. Idea that facility has been here along time but is now being "converted" or is hosting a new sort of project than when it was originally intended for. ^{may have to do w/ a change} (See p. 9) that does something, perhaps involving high technology ^(including high technology) ~~Activities, flux~~ or whatever. Some of physical + information isolation, i.e., like a S.A.P. here might be.
